THERMOS CLEANING BRUSH

It allows easy and uniform cleaning of products that are not suitable for machine cleaning, such as thermos jugs and kettles, thanks to the brush profile that adapts to the existing shape, with kitchen cleaner and bristles of suitable hardness.

The sponge unit ensures perfect cleaning of the bottom of thermos flasks and hard-to-reach areas.

There is a hanging hole on the handle of the brush for hanging it up after use.

ABOUT US

Our company was founded in 2005 in Istanbul with the development of the plastic and brush sector, innovative production system and the dedication to take quality as a basis. From its establishment to the present day, it continues its 18-year journey by adding more and more innovations day by day, without breaking our dedication on the first day. Our company continues to serve many countries in Europe and the Middle East, especially Turkey, with the ideals of the first day. Our production facility and office on the European side of Istanbul has been serving for 18 years. Our services continue with our structuring based on quality and innovative thinking and with the industry experience that years have added to us.
